

Machine Learning Application (MLA)

Instruction for Infrastructure

Overview of File Station Application

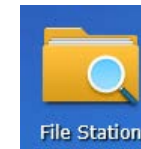

What is the application File Station?

- File Station is similar to MS Windows Explorer or Mac Finder
- It has a tree structure to show folders and files
- You can download and upload files (Uploading is possible via drag and drop)
- Manage files and folders: create, copy, move, delete, rename, etc.

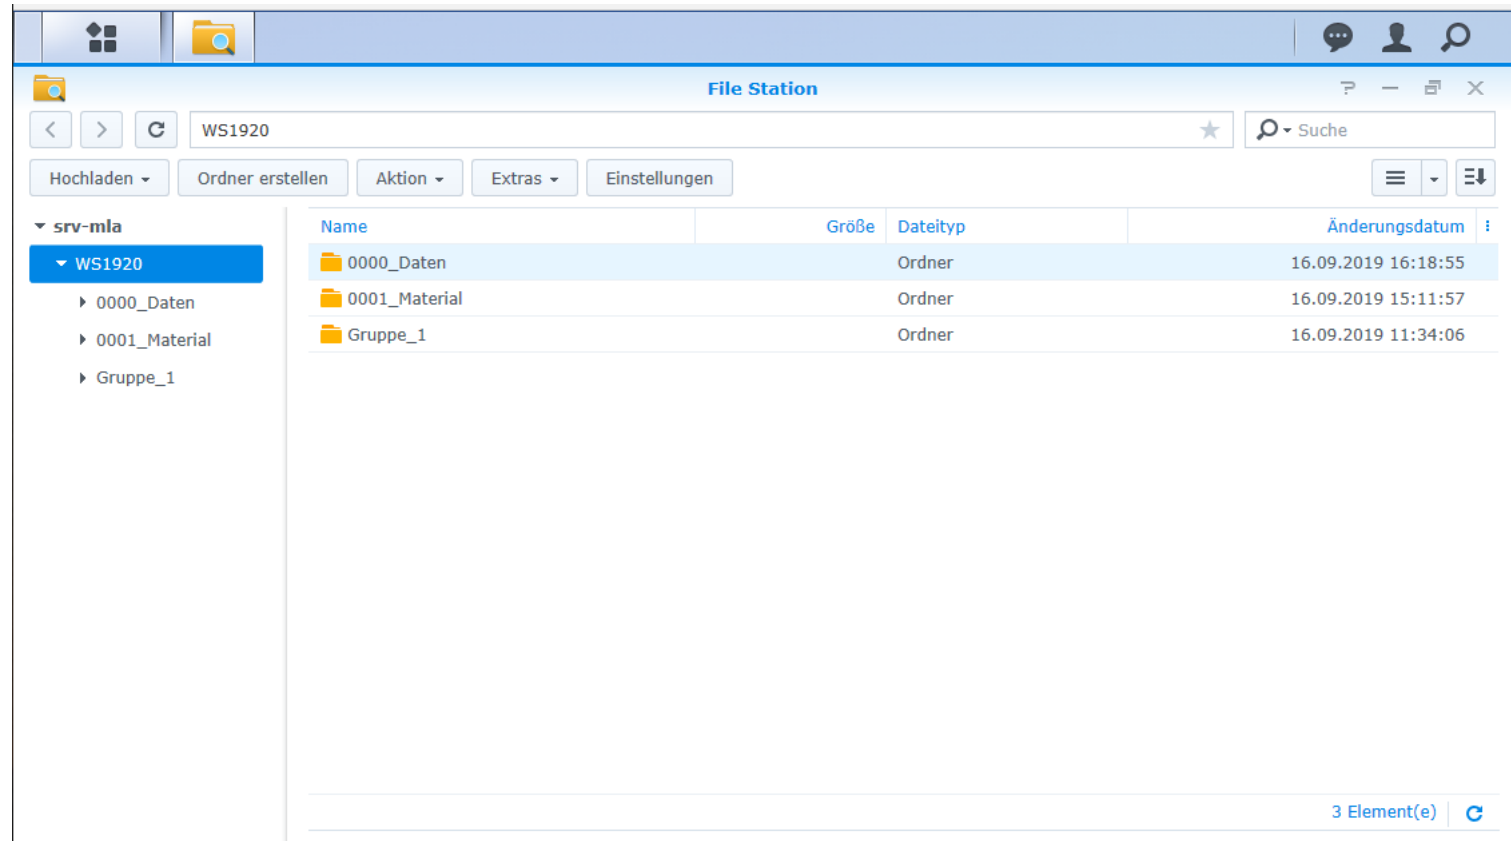

How do I access the File Station?

- Way 1: Click the File Station Icon on the desktop or start menu
- Way 2: Open the URL: <https://srv-mla.fsr.maschinenbau.tu-darmstadt.de/file>

What do I see in File Station?

- General folders in the current semester folder that contain the data or additional material
 - You only have the right to read
- The folder of your own group (e.g. Gruppe_1)
 - You and your group are allowed to read and write in this folder

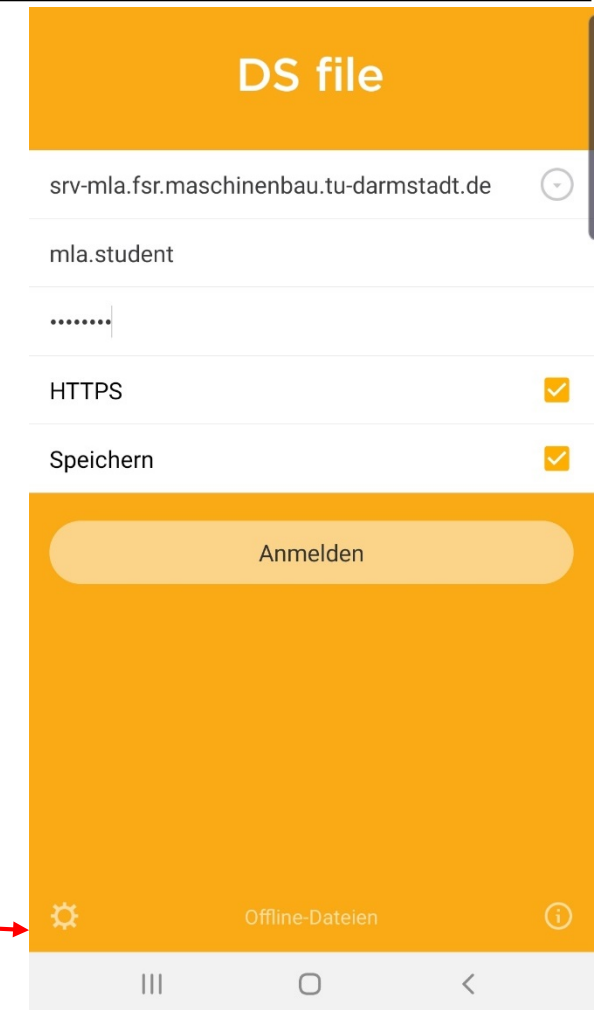

How do I Use the File Station?

- The button  does the same as clicking with the right mouse button on an element
- You can create folders by clicking on the button *Ordner erstellen* or doing a right mouse click
- You can copy and paste using CTRL+C/ STRC+V or the right mouse button
- You can download a complete folder as a .zip file doing a right mouse click on it
- You can upload files/folders via drag and drop, right mouse click or the *Hochladen* button
(*Überspringen* ignores files with the same file name; *Überschreiben* replaces files with the same name)
- You can rename files/ folders by pressing F2 or doing a right mouse click on them
- It's not possible to create sharing links – every group member has an account

Android und iOS App

- **DS File** App exists for Android and iOS to access the service via mobile devices
 - Android: <https://play.google.com/store/apps/details?id=com.synology.DSfile>
 - iOS: <https://apps.apple.com/de/app/ds-file/id416751772>
- Setup
 - **Adress:** srv-mla.fsr.maschinenbau.tu-darmstadt.de
 - Enter username and password
 - Check **HTTPS** option
- In case you receive a certificate error: open the settings and deactivate *Zertifikat überprüfen*
